

Middle Grades Math Education

As usual, we start with enrollment in either COR 1100 or ENG 1100 as well as ELN 1010. You might be trying to guess what the major is if the title wasn't written above. But this is a basic School of Education schedule that would work for a lot of students. Most Education majors do not take an EDU class in their first semester. Most focus on the disciplines needed for their education major.

This student started with MTH 1510: Calculus I because of the interest in Middle Grades Math Education. But they are also working on their World Language requirement by taking FRE 1010: Elementary French I; which also counts for their first Civilization class. They are completing a Lab Science with ENS 1110/1130: Intro to Environmental Science with Lab. And they are chipping away at Expression by taking MUS 1010: Wind Ensemble for 1 semester hour. Yes, that is correct. You can sometimes take 1 or 2 credit classes here and there to add up to an entire requirement.
