

## First-Year Only Sections: Fall 2023

The courses listed below are reserved exclusively for incoming first-year students. The classes listed here are not the full catalog of courses available to you. This list is just those restricted to new students in their first semester of college Elon. Additionally, some classes are high-demand topics with some sections reserved for FY students. Other sections of the course may be available that are open to students from any grade.

You will learn more about these courses during your required virtual advising meeting. For now, note topics of interest and then use the Course Catalog in OnTrack or the [Academic Catalog](#) to look up the description.

### First-Year Foundations Math:

Students must have placement for STS 2120 and MTH 1510 to enroll in these courses.
