

## Martin Alumni Center Garden

Throughout the history of the university this house has served many purposes, including housing, student health center, and financial planning. In 2013, the house became home to the Martin Alumni Center, and a garden was established. Serving as ground zero for inviting alumni coming back to visit campus.

Numerous alumni functions are held at this location annually. Throughout the brick walkways you will notice numerous Alumnus names engraved in the brick. While the building welcomes many alumni each year back to campus, the garden serves as a traditional planting in the botanical garden.

Uniting the past with the future of Elon University this garden gives alumni a welcoming space to enjoy when they visit.
