

Manfuso Plaza Garden

A renovation to the plaza occurred in 2004. The plaza was enlarged, tables and chairs were added to allow more outside dining, and numerous plants were installed to create a unique dining space. Most gardens are themed by the collection of plants that are represented in the space. In this case, the different types of plants that surround the space enhance the outdoor seating. Shade from the mature trees keeps the area cooler during the heat of the day.
