Elon Academic Dashboards Data Update Schedule

The following is a schedule of when files used in academic dashboards for the provost team, deans, and department chairs are updated. Most updates occur around 'Census Date' for each term.

(Census Date is when snapshot data is taken for official reporting - this is at the end of the drop/add period at the beginning of each term).

Census dates are listed on the Registrar's homepage at

https://www.elon.edu/u/registrar/censusfreeze-calendar/

On this date, we will update files for

- Current Term data
- End-of-Term data for Prior Term

The following files will be updated within approximately 3 - 5 business days after Census Date:

Courses

Majors and Minors

EOY Reports

Student Demographic Info

Retention

The following files will be updated at other points in time:

Elon Experiences - in September for the previous year participation

First Destinations - in April of the following year for the 9 month data on the previous graduating class

Graduation - in September for the previous academic year graduates and prior years for 5th year and 6th year rates

Majors Pipeline for Deans - by Aug 31 for the most recent cohort (currently Cohort '13 to show 4 and 5 year graduation rates)
