

I. Survey Methodology

The Elon University Poll is conducted using a stratified random sample of households with telephones and wireless telephone numbers in the population of interest – in this case, citizens in North Carolina. The sample of telephone numbers for the survey is obtained from Survey Sampling International, LLC.

Selection of Households

To equalize the probability of telephone selection, sample telephone numbers are systematically stratified according to subpopulation strata (e.g., a zip code, a county, a state, etc.), which yields a sample from telephone exchanges in proportion to each exchange's share of telephone households in the population of interest. Estimates of telephone households in the population of interest are generally obtained from several databases. Samples of household telephone numbers are distributed across all eligible blocks of numbers in proportion to the density of listed households assigned in the population of interest according to a specified subpopulation stratum. Upon determining the projected (or preferred) sample size, a sampling interval is calculated by summing the number of listed residential numbers in each eligible block within the population of interest and dividing that sum by the number of sampling points assigned to the population. From a random start between zero and the sampling interval, blocks are systematically selected in proportion to the density of listed household "working blocks." A *block* (also known as a *bank*) is a set of contiguous numbers identified by the first two digits of the last four digits of a telephone number. A working block contains three or more working telephone numbers. Exchanges are assigned to a population on the basis of all eligible blocks in proportion to the density of working telephone households. Once each population's proportion of telephone households is determined, then a sampling interval, based on that proportion, is calculated and specific exchanges and numbers are randomly selected. The methodology for the wireless component of this study starts with the determining which area code-exchange combinations in North Carolina are included in the wireless or shared Telcordia types. Similar to the process for selecting household telephone numbers, wireless numbers involve a multi-step process in which blocks of numbers are determined for each area code-exchange combination in the Telcordia types. From a random start within the first sampling interval, a systematic n th selection of each block of numbers is performed and a two-digit random number between 00 and 99 is appended to each selected n th block stem. The intent is to provide a stratification that will yield a sample that is representative both geographically and by large and small carrier. From these, a random sample is generated. Because exchanges and numbers are randomly selected by the computer, unlisted as well as listed household telephone numbers are included in the sample. Thus, the sample of telephone numbers generated for the population of interest constitutes a random sample of telephone households and wireless numbers of the population.

Procedures Used for Conducting the Poll

The survey was conducted Monday, April 19th, through Thursday, April 22nd, of 2010. During this time calls were made from 5:00 pm to 9:00 pm. The Elon University Poll uses CATI system software (Computer Assisted Telephone Interviewing) in the administration of surveys. For each working telephone number in the sample, several attempts were made to reach each number. Only individuals 18 years or older were interviewed; those reached at business or work numbers were not interviewed. For each number reached, one adult is generally selected based on whether s/he is the oldest or youngest adult. Interviews, which are conducted by live interviewers, are completed with adults from the target population as specified. Interviews for this survey were completed with 607 adults from North Carolina. For a sample size of 60, there is a 95 percent probability that our survey results are within plus or minus 4.1 percentage points (the margin of sampling error) of the actual population distribution for any given question. For sub-samples (a subgroup selected from the overall sample), the margin of error is higher depending on the size of the subsample. When we use a subsample, we identify these results as being from a subsample and provide the total number of respondents and margin of error for that subsample. In reporting our results, we note any use of a subsample where applicable. Because our surveys are based on probability sampling, there are a variety of factors that prevent these results from being perfect, complete depictions of the population; the foremost example is that of margin of sampling error (as noted above). With all probability samples, there are theoretical and practical difficulties estimating population characteristics (or parameters). Thus, while efforts are made to reduce or lessen such threats, sampling error as well as other sources of error – while not all inclusive, examples of other error effects are non-response rates, question order effects, question wording effects, etc. – are present in surveys derived from probability samples.

Questions and Question Order

The Elon University Poll provides the questions as worded and the order in which these questions are administered (to respondents). Conspicuous in reviewing some questions is the “bracketed” information. Information contained within brackets ([]) denotes response options as provided in the question; this bracketed information is rotated randomly to ensure that respondents do not receive a set order of response options presented to them, which also maintains question construction integrity by avoiding respondent acquiescence based on question composition. Some questions used a probe maneuver to determine a respondent’s intensity of perspective. Probe techniques used in this questionnaire mainly consist of asking a respondent if their response is more intense than initially provided. For example, upon indicating whether s/he is satisfied or dissatisfied, we asked the respondent “would you say you are very ‘satisfied’/‘dissatisfied’”. This technique is employed in some questions as opposed to specifying the full range of choices in the question. Though specifying the full range of options in questions is a commonly accepted practice in survey research, we sometimes prefer that the respondent determine whether their perspective is stronger or more intense for which the probe technique used. Another method for acquiring information from respondents is to ask an “open-ended” question. The open-ended question is a question for which no response options are provided, i.e., it is entirely up to the respondent to provide the response information.

The Elon University Poll

The Elon University Poll is conducted under the auspices of the Center for Public Opinion Polling (Hunter Bacot, Director & Mileah Kromer, Assistant Director), which is a constituent part of the Institute for Politics and Public Affairs (George Taylor, Director); both these organizations are housed in the department of political science at Elon University. These academic units are part of Elon College, the College of Arts and Sciences at Elon University. The Elon University administration, led by Dr. Leo Lambert, President of the university, fully support the Elon University Poll as part of its service commitment to state, regional, and national constituents. Dr. Hunter Bacot, a professor in the department of political science, directs the Elon University Poll. Elon University students administer the survey as part of the University’s commitment to experiential learning where “students learn through doing.”

II. Survey Instrument and Percent Distributions by Question

Interviews were completed with 607 adults from households in the North Carolina. For a sample size of 607, there is a 95 percent probability that our survey results are within plus or minus 4.1 percentage points (the margin of sampling error) of the actual population distribution for any given question. Due to rounding, column totals may not equal 100 percent as indicated. Data are weighted to reflect the adult population in terms of gender, age, and race.

About the Codes appearing in Questions and Responses	
Response Options not offered	Response options are <u>not</u> offered to the person taking the survey (respondent); these are included in the question asked and randomly rotated (and denoted by brackets, []). Response options are generally offered only for demographic questions (background characteristic, e.g., age, education, income, etc.).
(v) = volunteered response	Respondents volunteer response option. As response options are <u>not</u> offered to those taking the survey, some respondents offer or volunteer response options. Though not all volunteered options can be anticipated, the more common options are noted.
(p) = probed response	Respondents self-place in this option or category. A probe maneuver is used in questions to allow the respondent to indicate whether her/his response is more intense than initially provided for in the choices appearing in the question. For example, on probe questions the interviewer, upon a respondent indicating that she/he is satisfied (or dissatisfied), is instructed to ask him/her "Would you say you are "very satisfied"?"

Now, I'd like to ask you about some rules being proposed for people working for the state or appointed to serve in a state agency, board, or commission. . .

I'm going to read you some questions about these rules and I want you to rate each one on a scale of 1 to 7, where [7 means the rule is too strict, 4 means it is about right, and 1 means it is not strict enough.]

So as I read each one, please rate it on the scale of 1 to 7.

	Not Strict Enough 1	2 & 3	About Right 4	5 & 6	Too Strict 7	Don't Know (v)
Requiring a person to wait at least a year before they can work for a company or organization that they do business with. Do you think this rule is [not strict enough, about right, or too strict]?	14.2	6.3	41.0	12.8	21.6	4.1
Requiring a person to give up their retirement pension if they are convicted of a felony related to their appointment. Do you think this rule is [not strict enough, about right, or too strict]?	13.0	5.1	46.5	12.4	19.3	3.6
Requiring a person to resign their appointment if they refuse to cooperate with an investigation, or are officially accused of a felony offense related to their appointment. Do you think this rule is [not strict enough, about right, or too strict]?	20.4	6.7	49.8	10.2	10.5	2.5
Requiring a person to resign from their appointment if they miss more than a quarter of their board or commission meetings. Do you think this rule is [not strict enough, about right, or too strict]?	15.0	8.0	56.2	9.5	9.4	1.9
Requiring a person to sign a pledge that identifies any conflicts of interest they have. Do you think this rule is [not strict enough, about right, or too strict]?	14.5	10.8	54.0	8.8	7.4	4.7
Requiring a person to refuse gifts from a company or organization that they do business with. Do you think this rule is [not strict enough, about right, or too strict]?	16.4	4.7	53.4	10.2	11.6	3.7

Total=607; +/-4.1%

Next, I'd like to ask you a few questions about offshore oil drilling.

As you are likely aware, drilling for oil is now open to areas that include the North Carolina Coast... Just so that we are clear, when talking about "offshore drilling" we are talking about the federal government leasing the rights to explore, develop, and produce oil and gas in waters off the U.S. coast.

So with this mind, do you [support or oppose] offshore drilling for oil and gas off the coast of North Carolina.

	March 2009	April 2010
STRONGLY OPPOSE (p)	13.6	12.7
OPPOSE	15.2	17.4
SUPPORT	35.3	36.4
STRONGLY SUPPORT (p)	30.8	26.5
DON'T KNOW (v)	4.6	6.5
REFUSED (v)	0.5	0.5
Total	N=758; +/-3.6%	N=607; +/-4.1%

Next, I'm going to read you some statements about energy supply and conservation.

	Strongly Disagree (p)	Disagree	Agree	Strongly Agree (p)	Don't Know (v)
Do you [agree or disagree] with increasing the use of nuclear power	12.6	23.5	35.9	19.9	8.2
Do you [agree or disagree] with spending more on urban rail & bus systems	8.0	20.4	45.3	19.9	6.4
Do you [agree or disagree] with increasing federal funding for research on wind, solar, and hydrogen technology	8.1	14.6	46.5	28.3	2.5
Do you [agree or disagree] with expanding offshore oil and gas drilling in U.S. waters	9.0	18.9	43.2	22.7	6.2

Total=607; +/-4.1%

Now I'm going to ask you about video poker in North Carolina. . .

Do you [support or oppose] video poker being available for play throughout North Carolina?

	March 2009	April 2010
STRONGLY OPPOSE (p)	23.6	24.9
OPPOSE	29.1	23.2
SUPPORT	22.7	30.3
STRONGLY SUPPORT (p)	5.4	4.3
SUPPORT IT AT CASINO ONLY (v)	1.0	0.7
THOUGHT IT WAS NOT AVAILABLE (v)	---	0.4
DON'T KNOW (v)	17.7	15.9
REFUSED (v)	0.4	0.3
Total	N=620; +/-4.0%	N=607; +/-4.1%

Do you believe video poker should be [legal or illegal] in North Carolina?

	March 2009	April 2010
ILLEGAL (NOT ALLOWED)	45.4	44.6
LEGAL (ALLOWED)	38.3	45.5
SHOULD REMAIN LIKE IT IS (v)	2.3	0.7
DON'T KNOW (v)	13.8	8.7
REFUSED (v)	0.1	0.6
Total	N=620; +/-4.0%	N=607; +/-4.1%

Now, changing topics a bit, I would like to ask you a few questions about gun laws. I'm going to read you a list of items and I would like you to tell me whether you [agree or disagree] with each one.

	Strongly Disagree (p)	Disagree	Agree	Strongly Agree (p)	Don't Know (v)
Permitting people to own semi-automatic handguns	25.5	22.2	31.7	17.1	3.6
Allowing the sale of assault rifles	31.7	37.8	21.3	6.6	2.6
Letting people carry a concealed handgun	17.9	23.3	38.7	17.8	2.3
Banning the sale of handguns	31.2	48.4	12.1	6.1	2.1

Total=607; +/-4.1%

Now, I'm going to read you a list of specific ways that some states deal with guns. . . please tell me if you [support or oppose] each of the following in the state of North Carolina.

	Strongly Oppose (p)	Oppose	Support	Strongly Support (p)	Don't Know (v)
Preventing certain people from owning handguns	2.7	9.8	48.8	34.9	3.8
Requiring a "waiting period" before citizens can purchase a handgun	3.3	10.9	49.9	34.3	1.5
Preventing gun owners from carrying a concealed handgun in public	13.5	34.3	27.9	19.3	5.1
Requiring gun owners to register their handguns with the local government	6.9	14.1	40.5	35.9	2.7

Total=607; +/-4.1%

Do you, personally, own a gun?

	April 2010
NO	58.9
YES	40.1
DON'T KNOW (v)	0.5
REFUSED (v)	0.5
Total	N=607; +/-4.1%
