

# Perceptions of Presidential Candidates 

National and State-Wide Online Survey<br>June 4 to June 9, 2015

The Elon University Poll conducted two online surveys using a non-probability opt-in panel. This method was used in order to implement simultaneously a national survey and a state-wide survey of North Carolina. The project collected responses from 1125 adults living in the United States, 901 of whom stated they were registered to vote. The North Carolina survey obtained a sample of 835 adult residents in North Carolina, 709 of whom said they were registered to vote in the state. Both surveys were conducted between June 4th and June 9th.

## Candidate Name Recognition and Positive Associations

In this early stage of the presidential election the field of candidates is still evolving. Public opinion polls at this time are better at gauging candidate name recognition than they are in predicting who will win the primary or general election. Name recognition has long been considered instrumental in determining the viability of a candidate. A number of studies in political science have found "to be perceived at all is to be perceived favorably. ${ }^{11}$ This may be especially true in presidential primaries. ${ }^{2}$ However, the famous proverb warns that "familiarity breeds contempt" and the more we know about a candidate the more opportunity we have to find faults with them. Other political scientists, such as Alan Abramowitz, concluded that name recognition does not always equate to positive feelings. ${ }^{3}$ In this study we explore name recognition and voters' positive and/or negative associations toward candidates by providing the following instructions to survey respondents:

[^0]"Below is a list of Republican [Democratic] candidates who have decided to run or have signaled their interest in running for president in 2016. For each candidate please type 1 or 2 words that first come to mind when you think of that person. If you don't know who that person is just type "don't know" or "dk"."

Democrats and Independents who more closely identify as a Democrat were asked to evaluate Democratic candidates, while Republicans and Independents who more closely identify as Republican were asked to evaluate Republican candidates. These responses were then coded as positive, neutral, or negative.

## National Survey - Republican Candidates

Table 1 shows the results of the coding of responses (in percentages) from 303 registered voters in the U.S. who are Republican or lean Republican. Several conclusions can be inferred from the results:

- Jeb Bush had the strongest name recognition (lowest \% of "Don't Knows")
- John Kasich had the weakest name recognition of the candidates tested
- Jeb Bush also had the highest number of positive attributes listed by voters
- George Pataki had the lowest number of positive attributes listed by voters
- Chris Christie had the highest number of negative attributes listed by voter
- Ben Carson had the lowest number of negative attributes listed by voters
- Ben Carson had the highest ratio of positive to negative attributes
- Chris Christie and Lindsay Graham had the lowest ratio of positive to negative attributes

Table 1: Republican Name Recognition \& Positive/Negative Associations

| Candidate | Positive | Neutral | Negative | Don't Know | Ratio: Positive <br> to Negative |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Jeb Bush | $\mathbf{2 3 . 5}$ | 33.8 | 21.8 | $\mathbf{2 0 . 8}$ | 1.1 |
| Ben Carson | 22.9 | 20.1 | $\mathbf{4 . 4}$ | 52.6 | $\mathbf{5 . 2}$ |
| Marco Rubio | 21.5 | 27.0 | 8.5 | 43.0 | 2.5 |
| Mike Huckabee | 20.8 | 30.7 | 16.4 | 32.1 | 1.3 |
| Scott Walker | 20.8 | 19.1 | 6.1 | 53.9 | 3.4 |
| Rick Perry | 17.1 | 28.7 | 17.4 | 36.9 | 1.0 |
| Carly Fiorina | 15.4 | 15.7 | 12.3 | 56.7 | 1.3 |
| Rand Paul | 14.7 | 26.6 | 24.2 | 34.5 | 0.6 |
| Ted Cruz | 14.0 | 25.9 | 20.1 | 39.9 | 0.7 |
| Chris Christie | 13.0 | 22.5 | $\mathbf{3 0 . 0}$ | 34.5 | $\mathbf{0 . 4}$ |
| Rick Santorum | 12.3 | 30.4 | 16.7 | 40.6 | 0.7 |
| Bobby Jindal | 10.6 | 23.5 | 8.9 | 57.0 | 1.2 |
| John Kasich | 9.6 | 19.8 | 6.1 | $\mathbf{6 4 . 5}$ | 1.6 |
| Lindsay Graham | 5.8 | 20.8 | 16.4 | 57.0 | $\mathbf{0 . 4}$ |
| George Pataki | $\mathbf{5 . 1}$ | 24.9 | 11.3 | 58.7 | 0.5 |

Nationally, the results appear to present some good news for Jeb Bush. He has the strongest name recognition and is the candidate with the highest number of positive words and terms associated with them. However, he also has one of the largest amounts of negative attributes (only behind Chris Christie and Rand Paul). Familiarity does seem to breed some negative associations given that Bush, Christie and Paul have some of the strongest name recognition but also have a high number of respondents attaching negative terms to these candidates. One exception to this is Mike Huckabee who seems to be well-known (second lowest number of don't knows) and with only a modest amount of negative terms used to describe this candidate.

Perhaps the real winner is Ben Carson. With many respondents providing positive terms when thinking of this candidate, he also had an extremely low number of respondents connecting any negative terms to the candidate (only $4.4 \%$ ). This gave Carson, by far, the highest positive to negative ratio of any candidate name in the study. This could partly be due to the type of occupation Carson is associated with (doctor) and the fact that he has not held an elected office.

Although Chris Christie is better known than most other candidates, he had the most negative comments and tied Lindsey Graham for the lowest ratio of positive to negative comments. John Kasich had the highest number of respondents typing "don't know" or "dk", very few people had anything negative to say about the candidate. George Pataki had problems with both name recognition and the fewest number of respondents saying anything positive about the candidate.

For illustrative purposes, Table 2 presents the most common terms used by respondents when thinking of each of the Republican candidates.

Table 2: Nation - Most Common Terms Associated with Candidates

| Bush | Bush; Good; OK; Brother; Like; Best; Family; George |
| :--- | :--- |
| Carson | Good; Doctor; OK; Smart; Like; Great; Intelligent; Strong |
| Christie | No; OK; Fat; Jersey; Good; Like; Big; Conservative; Leader |
| Cruz | No; OK; Good; Conservative; Maybe; Not (Sure); Strong |
| Fiorina | No; Not (Sure); Unknown; CEO; Good; OK; Smart; Strong |
| Graham | No; Not (Sure); Unknown; Old; Southern; Conservative |
| Huckabee | OK; Good; Conservative; Religious; Like; Maybe; Old |
| Jindal | Good; No; OK; Unknown; Louisiana; Chance; Not (Sure) |
| Kasich | OK; Unknown; No; Good; Ohio; Who; Governor; Boring |
| Pataki | No; Not (Sure); OK; Unknown; New (York); Governor; Good |
| Paul | OK; Good; No; Like; Choice; Conservative; Libertarian |
| Perry | OK; Not (Sure); Good; No; Texas; Like; Maybe; Strong |
| Rubio | Good; OK; Young; Like; Maybe; Great; Hispanic; Not (Sure) |
| Santorum | OK; No; Good; Conservative; Like; Not (Sure); Strong |
| Walker | Good; OK; Like; Unknown; Conservative; Great; Strong |

## National Survey - Democratic Candidates

Table 3 presents the result of the national survey (in percentages) for 445 registered voters in the U.S. who are Democrats or lean Democrat.

Table 3: Democratic Name Recognition \& Positive/Negative Associations

| Candidate | Positive | Neutral | Negative | Don't Know | Ratio: Positive <br> to Negative |
| :--- | :---: | :---: | :---: | :---: | ---: |
| Hillary Clinton | $\mathbf{5 0 . 6}$ | 22.9 | 15.5 | $\mathbf{1 1 . 0}$ | $\mathbf{3 . 3}$ |
| Joe Biden | 33.0 | 36.6 | $\mathbf{1 7 . 0}$ | 13.4 | 1.9 |
| Elizabeth Warren | 22.7 | 22.6 | 11.0 | 43.7 | 2.1 |
| Bernie Sanders | 16.5 | 22.2 | 10.3 | 51.0 | 1.6 |
| Martin O'Malley | 7.1 | 23.7 | 9.5 | 59.8 | 0.7 |
| Jim Webb | 5.2 | 24.7 | $\mathbf{6 . 1}$ | 64.0 | 0.9 |
| Lincoln Chafee | $\mathbf{4 . 8}$ | 21.4 | 11.0 | 62.8 | $\mathbf{0 . 4}$ |

Clinton has both the strongest name recognition and the highest number of positive terms connected to any candidate. Furthermore, she has the highest ratio of positive to negative comments. Joe Biden had the second highest number of positive comments, but also had the highest number of negative comments connected to him. Elizabeth Warren, who has said she will not run for president, has stronger name recognition than Sanders, O'Malley, Webb, and Chafee. All of whom have already declared their intention to run. In addition, Warren's positive numbers are higher than all four of these candidates.

Table 4 presents the most common terms used by respondents when thinking of each of the Democratic candidates.

Table 4: Nation - Most Common Terms Associated with Candidates

| Clinton | Strong; President; Good; Like; Bill; First; Great |
| :--- | :--- |
| Biden | Vice President; Good; OK; Old; Great; Nice |
| Sanders | No; Good; Liberal; Cool; Independent; Non; Socialist |
| O'Malley | Who; No; Not (Sure); Good; Unknown; Governor; Maryland |
| Webb | No; Unknown; Who; Not (Sure); Virginia; Conservative; Intelligent |
| Chafee | No; Who; Unknown; Non; Not (Sure); Good; Chance |
| Warren | No; Good; Liberal; Like; Smart; Choice; Woman |

## North Carolina Survey - Republican Candidates

Table 5 below shows the results of the coding of responses (in percentages) of 294 registered voters in North Carolina who are Republican or lean Republican. The results are remarkably similar to the national survey.

Similarities:

- In both the national and state surveys Jeb Bush had the strongest name recognition
- In both surveys George Pataki had the lowest number of positive attributes listed by voters
- In both surveys John Kasich had the weakest name recognition
- In both surveys Ben Carson had the highest ratio of positive to negative comments
- In both surveys Chris Christie had the highest number of negative comments
- In both surveys Christie and Graham had the lowest ratio of positive to negative comments

## Differences:

- Mike Huckabee had the highest number of positive comments in the North Carolina survey, but came in 4th place in the national survey.
- Jeb Bush came in third in highest number of positive comments in the North Carolina survey, but was at the top in the national survey.

Table 5: Republican Name Recognition \& Positive/Negative Associations

| Republican <br> Candidate | Positive | Neutral | Negative | Don't Know | Ratio: Positive <br> to Negative |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Mike Huckabee | $\mathbf{2 5 . 4}$ | 22.3 | 19.6 | 32.6 | 1.3 |
| Ben Carson | 24.7 | 20.3 | 7.6 | 47.4 | $\mathbf{3 . 3}$ |
| Jeb Bush | 24.1 | 30.2 | 22.7 | $\mathbf{2 3 . 0}$ | 1.1 |
| Marco Rubio | 21.6 | 24.4 | 10.0 | 44.0 | 2.2 |
| Scott Walker | 20.6 | 14.1 | 7.9 | 57.4 | 2.6 |
| Rand Paul | 17.5 | 23.7 | 21.3 | 37.5 | 0.8 |
| Rick Perry | 15.5 | 22.7 | 20.3 | 41.6 | 0.8 |
| Ted Cruz | 15.1 | 27.5 | 14.8 | 42.6 | 1.0 |
| Chris Christie | 14.8 | 15.1 | $\mathbf{3 5 . 4}$ | 34.7 | $\mathbf{0 . 4}$ |
| Rick Santorum | 12.0 | 30.9 | 15.8 | 41.2 | 0.8 |
| Bobby Jindal | 10.7 | 22.3 | 8.6 | 58.4 | 1.2 |
| Carly Fiorina | 10.0 | 15.5 | 10.7 | 63.9 | 0.9 |
| Lindsay Graham | 6.5 | 26.8 | 18.6 | 48.1 | $\mathbf{0 . 4}$ |
| John Kasich | 6.5 | 12.0 | $\mathbf{6 . 5}$ | $\mathbf{7 4 . 9}$ | 1.0 |
| George Pataki | $\mathbf{5 . 8}$ | 15.8 | 11.3 | 67.0 | 0.5 |

Table 6 below presents the most common terms associated with the candidates. Many of the terms used by respondents in the North Carolina survey were also used by respondents in the national survey.

Table 6: NC - Most Common Terms Associated with Candidates

| Bush | Good; Bush; OK; Family; Brother; Florida; Great |
| :--- | :--- |
| Carson | Good; Doctor; Smart; Great; OK; Very; Honest; Like |
| Christie | OK; No; Fat; Good; Jersey; Strong; Idiot; Liberal; Outspoken |
| Cruz | No; Good; OK; Conservative; Maybe; Like |
| Fiorina | No; Who; Woman; Good; OK; Business; Maybe; Smart |
| Graham | No; OK; Good; Carolina; Conservative; Bad |
| Huckabee | Good; No; OK; Christian; Conservative; Religious; Honest |
| Jindal | Good; No; OK; Governor; Louisiana; Great; Likable |
| Kasich | No; Good; OK; Who; Unknown; Conservative; Governor |
| Pataki | No; OK; New York; Liberal; Old; Unknown; Interesting |
| Paul | No; OK; Good; Maybe; Conservative; Libertarian; Like |
| Perry | OK; Good; No; Texas; Governor; Maybe; Great; Honest |
| Rubio | Good; OK; Maybe; Young; Cuban; Like; Smart |
| Santorum | Good; OK; No; Maybe; Conservative; Like; Christian |
| Walker | Good; OK; NO; Governor; Great; Maybe; Not Sure; Who |

## North Carolina Survey - Democratic Candidates

Table 7 below shows the results of the coding of responses (in percentages) of 313 registered voters in North Carolina who are Democrats or lean Democratic.

Table 7: Democrat Name Recognition \& Positive/Negative Associations

| Candidate | Positive | Neutral | Negative | Don't Know | Ratio: Positive <br> to Negative |
| :--- | :---: | :---: | :---: | :---: | :---: |
| Hillary Clinton | $\mathbf{5 1 . 8}$ | 20.9 | 14.2 | $\mathbf{1 3 . 1}$ | $\mathbf{3 . 6}$ |
| Joe Biden | 35.1 | 31.5 | $\mathbf{1 7 . 5}$ | 15.9 | 2.0 |
| Elizabeth Warren | 23.3 | 18.2 | 9.4 | 49.1 | 2.5 |
| Bernie Sanders | 16.4 | 12.4 | 11.7 | 59.5 | 1.4 |
| Martin O'Malley | 6.9 | 9.7 | 10.6 | 72.8 | 0.7 |
| Jim Webb | 5.0 | 7.9 | $\mathbf{8 . 3}$ | 78.9 | 0.6 |
| Lincoln Chafee | $\mathbf{2 . 1}$ | 8.7 | $\mathbf{8 . 5}$ | $\mathbf{8 0 . 7}$ | $\mathbf{0 . 2}$ |

The results and rankings from the North Carolina survey are almost identical to the national numbers. However, there are some small differences. Clinton's positive numbers are slightly higher among Democrats in North Carolina than in the nation as a whole. In addition, O'Malley,

Webb and Chafee had many more respondents in North Carolina typing "don't know" or "dk" than respondents in the national survey.

Table 8 below displays the most common words used by respondents in North Carolina when thinking of the different Democratic candidates.

Table 8: North Carolina - Most Common Terms Associated with Candidates

| Clinton | Strong; Good; President; Great; Qualified; Bill |
| :--- | :--- |
| Biden | Vice President; Good; Old; OK; Great |
| Sanders | Good; Who; Liberal; Socialist; Unknown |
| O'Malley | No; Unknown; OK; Who; Good; Maryland; Not (Sure) |
| Webb | Good; Not Sure; Who; OK; Unknown |
| Chafee | No; Unknown; OK; Who; Not (Sure); Rhode Island |
| Warren | Good; OK; Smart; Great; Qualified; Senator; Woman |

Party ID: Generally speaking, do you usually think of yourself as a Democrat, Republican, Independent, or something else?

|  | North Carolina |  | United States |  |

## Question Ordering

The entire survey can be viewed exactly as displayed to respondents at:
http://elon.co1.qualtrics.com/SE/?SID=SV 5yYH5DZaox7N8CV

- Introduction

0 intro $\qquad$ Introduction to Survey

0 resident $\qquad$ Are you a resident of NC [US]

0 regist............................................................................ Are you registered to vote
0 gender/sex......................................................................What is your gender/sex
o race What racial/ethnic group

O age $\qquad$ How old are you

0 courtintro $\qquad$ How much trust in Supreme Court
o courtideo $\qquad$ Ideological leaning of Court
o obamacare ACA be modified or abolished

O gaymarriage Should gay marriage be legal in all states
o Licenseplate $\qquad$ Should Confederate plate be allowed

- Fourth of July Question [Results to be presented in future report - elon.edu/elonpoll]
o plans $\qquad$ .Plans for 4th of July
o food Favorite food on July 4th
o beer $\qquad$ Do you drink beer on 4th of July

0 beer2 $\qquad$ favorite beer
o founding fathers $\qquad$ quality control question

- Partisanship

O partyid
Party Identification
o partyidrep $\qquad$ Party ID Branch [strong Republican]
o partyiddem Party ID Branch [strong Democrat]
o partyidind $\qquad$ Party ID Branch [Closer to GOP or Dem]

- List of Democratic Candidates - type 1 or 2 words that first come to mind [Names rotated]

Hillary Clinton
Joe Biden
Bernie Sanders
Martin O'Malley
Jim Webb
Lincoln Chaffee
Elizabeth Warren

- List of Republican Candidates - type 1 or 2 words that first come to mind [Names rotated]

Jeb Bush<br>Ben Carson<br>Chris Christie<br>Ted Cruz<br>Carly Fiorina<br>Lindsay Graham<br>Mike Huckabee<br>Bobby Jindal<br>John Kasich<br>George Pataki<br>Rand Paul<br>Rick Perry<br>Marco Rubio<br>Rick Santorum<br>Scott Walker

0 founding fathers2 $\qquad$ Would FF approve of the quality of candidates

- Demographics
o ideology $\qquad$ when it comes to politics

O educ $\qquad$ How much school have you completed

0 inc $\qquad$ Annual household income
o religion What is your present religion
o evangelical $\qquad$ Are you a born again or evangelical Christian

0 zipcode. $\qquad$ What is your zip code

0 south $\qquad$ Are you originally from the South [NC survey only]

0 accent $\qquad$ Do you have a southern accent [NC survey only]
o movie $\qquad$ Favorite movie or film

| Survey Mode: | Online using opt-in panel from Survey <br> Sampling International (with quotas to balance <br> sample to reflect U.S. Census information for <br> North Carolina or the United States) |
| :--- | :--- |
|  |  |
| Registered Voters in North Carolina \& the U.S. |  |

Non-probability online surveys are used by numerous academics and organizations and have produced interesting and accurate results. ${ }^{4}$ However, the American Association of Public Opinion recommends organizations not produce margins of errors when using non-probability, opt-in survey data because audiences may interpret the findings as coming from a probability sample. Information on Survey Sampling International's online panel can be found on their website located at: http://www.surveysampling.com/who-we-are/awards.

The survey was sponsored, designed and administered by the Elon University Poll. Qualtrics online survey software was used to design the survey. To view the national survey as it appears to a respondent you can take the Qualtrics survey by visiting the following link:
