## ELON POLL

## About This Survey

The Elon University Poll conducted a representative online survey of 1,221 registered voters in North Carolina from October 26-27, 2022.

The overall results have a credibility interval of +/- 3 percentage points. Unless otherwise noted, results reported below are percentages (\%) and sample sizes ( N ).

In this survey, we asked (self-reported) NC registered voters about their plans to vote in the upcoming November 2022 election, their confidence in the election process, their views on the economy and abortion, and, to indicate whether they are closer to the Democratic or Republican party on a wide range of issues. The question order is reflected in the order of the results reported in the Toplines. Several of these questions were repeated from prior Elon poll surveys, and where possible, we have included relevant points of comparison in grey shaded columns in the tables below.

## Vote Intentions and Motivation (p. 4)

At the time this survey was in the field, over a week before Election Day, 28\% of NC voters said they had voted already through early voting. Among those who had not voted yet, $76 \%$ said they were somewhat or extremely likely to do so. When asked in comparison to past elections like this one, $61 \%$ said they were more motivated to vote this year than they have been before.

Views of the Economy (pp. 5-6)
NC voters letter grade for the national economy is notably more negative than it was in 2020. In this survey, only $15 \%$ gave the current national economy a letter grade or A or B, $32 \%$ gave it the letter grade of a C , and $53 \%$ gave it a letter grade of a D or F . When this same question was asked of voters in advance of the 2020 presidential election, $26 \%$ of NC voters gave the economy a letter grade an A or B, $32 \%$ gave it a C , and $42 \%$ gave it a of D or F .
$75 \%$ of NC voters said the national economy has gotten worse since 2020, and $55 \%$ said their own personal financial situation has gotten worse since 2020.
$82 \%$ of NC voters say inflation has had at least somewhat of a negative effect on themselves and their families. $28 \%$ say it's affected them very negatively and $25 \%$ said it's affected them only a little negatively.
$69 \%$ of NC voters believe the Biden administration is at least somewhat responsible for recent levels of inflation. Only $28 \%$ said the Biden administration was not very responsible or not at all responsible.

## Election Confidence (pp. 7-9)

Overall, NC voters are expressing slightly more confidence in the integrity of the election process than they have in past surveys, but the level of confidence is generally not very high. Only $30 \%$ were very confident that overall the election process will be fair, and only $20 \%$ were

## ELON POLL

very confident that should the results go to the courts, the judicial system would make a fair decision. $19 \%$ were very concerned about violence breaking out after the 2022 election compared to $38 \%$ in 2020.

Views on Abortion (p. 10)
Since the overturning of Roe v. Wade, $72 \%$ of NC voters have been fairly or very closely following news about new or changing abortion restrictions in North Carolina.
$20 \%$ of NC voters say they expect an abortion ban would have a negative impact on themselves and their family, $15 \%$ say it would have a positive impact, and $66 \%$ say it would have neither a positive or negative impact.
$53 \%$ of NC voters would be dissatisfied if abortion were to be banned in the state of North Carolina, $28 \%$ would be satisfied, and $19 \%$ would be neither satisfied nor dissatisfied by such a ban.

## Abortion Knowledge (p. 11)

About one-third ( $32 \%$ ) of NC voters knew that the most performed abortions are at-home medication, prescribed by a doctor. $69 \%$ incorrectly believed that in-office procedures were more common. $72 \%$ of NC voters knew that most abortions are performed in the first trimester. $56 \%$ of NC voters knew that childbirth is associated with a higher risk of medical complications, relative to abortion. Only $14 \%$ of NC voters knew all three of these facts.

## Issue Proximity (pp. 12-14)

North Carolina voters were more aligned with the Republican party on issues related to the economy, immigration, foreign affairs, crime, the size and scope of government, and oil, gas, and energy policy.

NC voters were more aligned with the Democratic party on issues related to education, abortion, race relations, gun control, healthcare, climate change, and voting policies.

For further interpretation of the key findings from this survey, please see the press release associated with this report.

## Crosstabulations

## Guide for Interpretation

In this section of the report, the numbers in each table reported are row percentages, and comparisons can be made within columns. Due to weights and rounding, row percentages do not always sum to 100 . In general, caution is warranted when interpreting differences in the crosstabulations; sub-group sample sizes are smaller, and therefore the credibility intervals for these estimates are wider.

## Motivation to Vote

"Compared to past elections like this one, would you say that you are more motivated to vote, less motivated to vote, or about the same level of motivated to vote?"

Weighting Variables:

Online
North Carolina Registered Voters
October 26-27, 2022
1,221
+/- 3
Party Registration, Race, Hispanic Ethnicity, Sex, Age, Education, County Density

## Procedure

The Elon University Poll used an online sample provided by Lucid, LLC. Respondents were recruited for this sample from many sample providers in the Lucid marketplace and received small amounts of compensation in exchange for their opinions. The survey was not an openlinked posted on social media, but rather was by direct invitation to a very large national pool of people who agree to take online surveys. More information about the Lucid marketplace and quality tests are available here. Quotas on race, Hispanic ethnicity, sex, and age were applied prior to online survey commencement.

Online interviews were included in the final dataset if respondents spent a minimum length of time on the interview and particular sections, and if a respondent progressed through the entire survey. Open-ended online responses were individually inspected by the poll directors, who then deleted thirty cases that were invalid. Respondents were recruited to the survey with a generic description about issues in North Carolina.

## Credibility Interval

Unlike a traditional random digit-dial telephone survey, online surveys do not have traditional margin of errors. Nonprobability quota samples like these do not adhere to assumptions of random selection. To account for uncertainty inherent in any sample-based research design, we provide a credibility interval. More information about this technique can be found here. The credibility interval was calculated by inflating traditional confidence intervals by a design effect calculated using the squared sum of weights. For this North Carolina sample, this means: (1.054 * $2.8=2.955$ ). We round these values up for presentation of results. As with all surveys, total survey error often exceeds sampling error.

## Support for Transparency

The Elon University Poll supports transparency in survey research and is a charter member of the American Association for Public Opinion Research Transparency Initiative, which is a program promoting openness and transparency about survey research methods and operations among survey research professionals and the industry. All information about the Elon University Poll that we release to the public conforms to reporting conventions recommended by the American Association for Public Opinion Research and the National Council on Public Polls.

## Weighting Information

Weights were generated in Stata using a technique known as iterative proportional fitting, also known as raking. The weight variable was calculated based on all of the variables in the table below. Population parameters for education among NC registered voters were estimated from national 2020 U.S. Census data. Population parameters for sex, race, and party registration were drawn from NC State Board of Elections data, downloaded on October 30 ${ }^{\text {th }}, 2022$ (age from NCSBE in 2020). NC Counties were categorized according to this map from NC Rural Center.

|  | Population <br> \% | Unweighted \% | Weighted \% |
| :---: | :---: | :---: | :---: |
| 18-24 | 11 | 9 | 11 |
| 25-44 | 33 | 33 | 33 |
| 45-64 | 33 | 36 | 33 |
| 65+ | 23 | 22 | 23 |
| Male | 46 | 48 | 46 |
| Female | 54 | 52 | 54 |

| Black | 20 | 20 | 20 |
| Other | 15 | 13 | 15 |
| Not Hispanic | 96 | 94 | 96 |
| Hispanic | 4 | 6 | 4 |
| Republican | 30 | 32 | 30 |
| Democrat | 34 | 37 | 34 |
| Unaffiliated or Other | 36 | 31 | 36 |
| < Bachelor's | 64 | 60 | 64 |
| Bachelor's or more | 36 | 40 | 36 |
| Rural County | 39 | 43 | 39 |
| Suburban County | 25 | 26 | 25 |
| Urban County | 36 | 31 | 36 |

## Frequently Asked Questions

## 1. Who pays for the Elon University Poll?

Elon University fully funds the Elon University Poll. The poll operates under the auspices of the College of Arts and Sciences at Elon University, led by Dean Gabie Smith. The Elon University administration, led by Dr. Connie Ledoux Book, president of the university, fully supports the Elon University Poll as part of its service to the community. Because of this generous support, the Elon University Poll does not engage in any contract work. This permits the Elon University Poll to operate as a neutral, non-biased, non-partisan resource.
2. Does the Elon University Poll favor a certain party?

The Elon University Poll is an academic, non-partisan survey research organization. We do not engage or work with any political candidates or parties. We employ best practices to ensure the results are not biased.

## 3. Did you weight the data?

Yes. We apply weights to the data. For this survey, we generated results using raking based on U.S. Census and NC State Board of Elections data. For more details, see the Weighting Information above.
4. What are the advantages and disadvantages of online surveys over traditional randomdigital dial surveys?

Traditional telephone surveys have traditionally had an advantage over online surveys such as this in that assumptions of equal probability of selection are more appropriate.
Furthermore, online surveys do not capture opinions of respondents who lack internet access. However, our opinion is that declining telephone response rates and the growth in online sample pool sizes have narrowed quality differences between the two modes. Additional information about opt-in surveys in general is available from AAPOR and the Pew Research Center.

## ELON POLL

## About the Elon University Poll

The Elon University Poll conducts statewide, regional, and national surveys on issues of importance to North Carolinians as well as other states. Information from these polls is shared with media, citizens and public officials to facilitate informed public policy making through the better understanding of citizens' opinions and attitudes.

Jason Husser is Director of the Elon University Poll and Associate Professor of Political Science \& Policy Studies at Elon University. Dr. Husser holds a Ph.D. in Political Science from Vanderbilt University. He researches American political behavior and survey methodology.

Kaye Usry is Assistant Director of the Elon University Poll and Assistant Professor of Political Science \& Policy Studies at Elon University. She received her Ph.D. from the University of Illinois at Urbana-Champaign. Her research interests are in American politics and political psychology.

Owen Covington is Director of the Elon University News Bureau. A native North Carolinian, Owen Covington joined the staff of Elon University in 2016 after spending 17 years in the field of journalism as a reporter and editor for daily and weekly news outlets in North Carolina and Kentucky. As director of the Elon University News Bureau, Covington oversees the promotion of Elon and its students, faculty and staff both through stories told across Elon's media channels as well as through interactions with state, national and international media. He is involved in media relations, including responding to requests from print, digital and broadcast media outlets, and works to promote content generated by a variety of Elon news sources.

For more information on the Elon University Poll, visit elon.edu/elonpoll
If you have specific questions about this poll, you can reach the directors of the poll via email (jhusser at elon dot edu \& kusry at elon dot edu).
